

Amethyst Class Newsletter

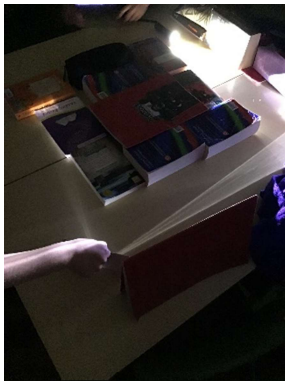

Science – Learning objective: Light travels in a straight line. The children enjoyed investigating with reflections in a mirror and made a mirror maze for the light beam.

History- WE learnt how WW2 started and which countries were involved.

Maths- Using equivalent fractions to order and compare different fractions.

English – Character study from our class book and writing a letter from one of the character’s point of view.

Art- We have started our abstract art unit by looking at paintings by the artist Picasso.

Coming up next week
Learning focused

Way to support at home (home learning)

Science – Light
Art – Painting skills
History- WW2
Maths- Fractions, percentages
and decimals
English – Writing is non-
chronological

TTRS, Reading and Mathletics

Historical research. We are learning about life in 1940s/WW2 Britain, I would like you to find out about a member of your family who lived in the 1940s. You may have to ask other family members for stories they have been told as the person may no longer be living. You should write some questions first about what their life was like. Once you are ready, carry out your interview either with the relative themselves or someone who knows about their life.

Present your historical findings however you choose, a video of your interview, a power point, a report, etc... Email your report or bring into school by February 7th so we can share in class the following week.

Key dates coming up:

SATS meeting for parents 6th February 9:15 –9:45 am
