Maths – Using BIDMAS to know the order of operations

Science- KLB Science visitors. A very exciting afternoon, where 10 year 12 students and Mr Goode the science teacher, came to teach the children about the heart. They brought with them 10 lamb's hearts for the children to look at and dissect! They were very enthusiastic and fascinated by this investigation. The teacher praised them for their knowledge, questions and attitude towards learning. Several of the children claimed it was "The best afternoon learning ever!"

English – We have started writing our persuasive Fair-Trade leaflets, these will be given out with our biscuits at the after-school sale on the 6th December.

Life Skills Centre visit- we are all looking forward to our visit today (22nd) and I'm sure the children will have lots to report back!

Coming up next term Learning focused	Way to support at home (home learning)
