

# Amethyst Class Newsletter

Science- Investigating and comparing invertebrates in the school grounds. The children worked in groups across the 2 classes to investigate the following: Which is the most common species of invertebrate in the school grounds. The exploring different habitats: Underground, by digging into the earth; tree canopy, by using a pole to shake the branches over a sheet and ground level, by lifting logs and stones on the field. There was great excitement and a wide variety of species found! The most common was found to be woodlice, closely followed by worms by most groups.

The children presented their poems in the church during our Harvest Festival.

We have also completed a range of test this week, as across the school it is assessment week.

<p>Coming up next week Learning focused</p>	<p>Way to support at home (home learning)</p>
<p>Science – Different types of plants Art – Georgia O’Keeffe Geography- Energy for the future Maths- properties of number English – Planning a narrative</p>	<p>Please ensure children are doing their Mathletics, TTRS each week – new learning is set on a Thursday.</p>

*Have a good weekend we have been impressed by the children’s attitude this week.*

Key dates coming up:

October 11<sup>th</sup> – INSET day
