

Crystal

What a busy first week we have had in Crystal class! The children started the week super excited about our trip, but they still carried on their learning brilliantly! We started our new English book, Leo and the Gorgon's curse. The children then roleplayed the story line of the book to help them remember. There are some brilliant actors and actresses in crystal class! We then finished off our learning of fractions by counting in tenths and putting fractions on a number line. We then moved onto our new multiplication and division topic where we will start using our times tables to help us figure out those bigger numbers. We practiced multiplication and division of our times tables by using manipulatives like lego and multilink to show our workings out physically. We also started to look at our new artist Henry Matisse as well as starting our history by looking at the day in the life of an Ancient Greek.

Harry Potter trip

The children blew me away! We had so many compliments surrounding how respectful the children were, how well they listened and how inquisitive they were! They couldn't have done me and the school any prouder, they were very responsible and helpful! The children were able to excitedly spot all the mythical creatures, and we can't wait to write everything about them in our English this term. Each child also received a flying broomstick picture, I will download and share these to you all over email over the following week.

Key dates coming up:

6th March- world book day

3rd April – parent outcome- 2:45pm

Coming up next week

Learning focused

English – diary in the life of an ancient greek child.

Maths- Multiplication and division

Science- looking at the system and lifecycles of plants

Art- Creating collages

Way to support at home (home learning)

Read some diary entries at home

Times tables and divisions!

Nature hunting and looking for small signs of spring (if the weather allows!)

Create some collages using different materials
