

Crystal

We are at the end of a very busy week in Crystal class after lots of swimming! The children have been great although, very tired after all their hard work. In English, the children have started to create their information leaflets all about Greece. So far, they have written all about Greece as a country, what ancient Greece was like and have written recipes ready for our parent outcome next week! In Maths, we have moved onto data collection. So far, the children have looked at frequency tables, tallies and pictograms. We have also started to look at presenting and interpreting information within bar charts. Summer term, we will be looking at time and telling the time. We will also be looking at roman numeral clocks. It is always good to get a head start with time at home as it always proves tricky!

In spellings, we are still looking at apostrophes for contraction and possession. I am seeing a lot of 'shouldent or couldent' instead of shouldn't and couldn't- these could be practiced at home if possible!

The children are welcome to dress up as anything Greek next Thursday! The children will be baking flatbreads ready for

Coming up next week Learning focused

Data and statistics using tally charts and pictograms in maths.

Instruction writing in English.

Water transportation and seed dispersal in Science.

Way to support at home (home learning)

Get the children to count or observe an object and create a chart of their choice to record their findings. Talk about how they could represent a half if using a pictogram.

Ask the children to write steps on how to make their favourite meal or complete their favourite activity for someone who may have never done this activity/recipe before.
