

## Jet Class Newsletter

This week in Jet Class we have started to write our innovated versions of our class story Hom. This book has been a wonderful inspiration for the children and we have seen some super writing from them. We are sure they will be keen to share their stories with you at our upcoming Learning Exhibition in week 7. In Science we have carried out a very exciting experiment to investigate which material would be best for Hom to use to stop his ice cubes melting so fast on his desert island. The children have enjoyed their transition mornings with Miss Hurford this week and having the time to explore their new classroom. They have come back very happy and excited about their new beginning in Year 3.

Key dates coming up:

Jet class Learning Exhibition - Thursday 18<sup>th</sup> July @ 2.45

Last day of term - Tuesday 23<sup>rd</sup> July

### Coming up next week

In English we will be continuing to write our innovated Hom stories.  
In Maths we will revise our multiplication and division skills.  
In Geography we will think about how people have adapted to living in very cold and very hot places.

### Ways to support at home

Times Tables  
Spellings  
Reading x 5 a week  
Please keep practising telling the time to 5 minute intervals on an analogue clock
