

Jet Class Newsletter

This week in Jet Class the children have been learning about and applying positional language and direction. We have consolidated our learning in ICT by programming Beebots. In Geography we are developing our understanding of the world. The children have learnt that the world is split into the Northern and Southern hemispheres and they have located the Equator and the Tropics of Cancer and Capricorn. We have thought about the places on Earth that are hot, warm and cold and why this might be. In Science we are continuing to develop our understanding of materials and that the same material may have different properties depending on its form.

Key dates coming up:

INSET Day - Friday 28th June 2024

Jet Class Project Outcome - Thursday 18th July @ 2.45

Coming up next week	Ways to support at home
<p>In English we will start to plan our retell of Hom that includes an innovated middle.</p> <p>In Maths we are using addition and subtraction to problem solve.</p> <p>In Geography we will use atlases to find the countries that the Equator and the Tropics pass through.</p>	<p>Times Tables</p> <p>Spellings</p> <p>Reading x 5 a week</p> <p>Please keep practising telling the time to 5 minute intervals on an analogue clock</p>
