

10<sup>th</sup> October 2024

# Pearl Class Newsletter

A short but busy week this week for Pearl class!

In science, the children have been exploring different classification of plants. We will be starting to share our Home Learning next week so please remember to get it in! Please note I don't need the slices of mouldy bread in school, just a write up, video, presentation of their findings!

During English, the children have been writing descriptions and diary entries this week all linked to our class book: *The Garbage King*. This is all in preparation for starting to write an extended narrative for the last 2 weeks of term.

In maths, we have been learning about prime numbers this week and revisiting other properties of number such as: factors, multiples, squares and cubes.

During geography this week we have been looking at Energy sources in the world and thinking about Energy for the future.

In art, the children are creating pieces in the style of Georgia O'Keefe, the children have been trying different materials in preparation of producing their final piece of O'Keefe inspired work.
